

Dear Colleagues,

It is our greatest pleasure to invite you to the 12<sup>th</sup> Annual Meeting of the German-Polish Radiological Society, which will be held in Magdeburg, Germany, from September 14<sup>th</sup> – 15<sup>th</sup>, 2007.

Radiology today is undergoing exciting developments and transitions. Besides impressive advances in the field of diagnostic imaging such as Multislice-CT or Ultrahighfield-MRI, improvements of image guidance, catheter techniques and human experience have extended the Radiologist's potential tasks deep into therapeutic approaches.

Consequently, the scientific focus of our meeting this year will be Interventional Radiology and Microtherapy. Next to high resolution imaging necessary for image guided therapies, established as well as novel interventional techniques will be discussed by experts in the field.

To encourage specifically young researchers to present their scientific work in both diagnostic and interventional Radiology, the Werner-Porstmann Society has donated an award for the best oral presentation and as well as the best poster.

This year's event will take place in the fascinating medieval town of Magdeburg. A diverse social program including activities organized for spouses will add to ensure a most remarkable and comfortable stay.

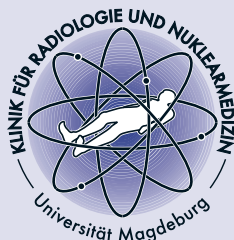

We are looking forward to seeing you in Magdeburg in September!

J. Ricke
